6. Role of complementary therapies in the understanding of primary healthcare professionals: a systematic review
7. Opinião de médicos e enfermeiros sobre o uso da fitoterapia e plantas medicinais na Atenção Básica
8. Investigation into Factors Influencing Roles, Relationships, and Referrals in Integrative Medicine
9. Política de práticas integrativas e complementares: potência de ampliação do cuidado na Atenção Primária
10. Paradigm Shift: Stages of Physicians' Entry into Integrative Practice
11. Relato de experiência do curso de plantas medicinais para profissionais de saúde
12. Integration of complementary and alternative medicine in primary care: What do patients want?
13. Diálogo entre profissionais de saúde e práticas populares de saúde
14. Práticas integrativas e complementares na atenção primária em saúde: em busca da humanização do cuidado
15. Development and implementation of an herbal and natural product elective in undergraduate medical education
16. Knowledge and Attitudes of Primary Health Care Physicians Towards Complementary and Alternative Medicine in the Riyadh Region, Saudi Arabia
17. A pilot study to compare the views of traditionally trained and CAM-trained therapists using the clinical exemplar of the management of neck/upper limb pain to assess barriers to effective integration of approaches
18. A model for the incorporation of the traditional healers into the national health care delivery system of South Africa
19. O conhecimento dos profissionais de saúde acerca do uso de terapias complementares no contexto da atenção básica
20. Attitude of conventional and CAM physicians toward CAM in India
21. Atención en salud con pertinencia intercultural: Módulo técnico - teórico. Dirigido a personal facilitador de salud
22. Responding to GPs' information resource needs: implementation and evaluation of a complementary medicines information resource in Queensland general practice.
23. Integralidade da assistência na compreensão dos profissionais da estratégia saúde da família
24. Integration of complementary and alternative medicine information and advice in chronic disease management guidelines

25. Percepção de médicos e enfermeiros da estratégia de saúde da família sobre terapias complementares
26. Family Health Strategy doctors and nurses' perceptions of complementary therapies.
27. A study to examine the attitudes, knowledge, and utilization of CAM by primary care professional in West Texas
28. Sentidos da integralidade do cuidado na saúde da família/ Sentidos de la integralidad del cuidado en la salud de la familia/ Meanings of comprehensiveness in family health care
29. Integrative medicine: enhancing quality in primary health care
30. Can we rapidly identify traditional, complementary and alternative medicine users in the primary care encounter? A RIOS Net study.
31. Das medicinas tradicionais às práticas integrativas de saúde: caracterização dos recursos humanos nas práticas alternativas de saúde adotadas no Distrito Federal
32. The integration of bio-medicine and culturally based alternative medicine: implications for health care providers and patients.
33. Sistematización de experiencias de medicina alternativa y terapias complementarias en el sistema de atención formal de Bogotá, D. C
34. A utilização da fitoterapia e de plantas medicinais em unidades básicas de saúde nos municípios de Cascavel e Foz do Iguaçu – Paraná: a visão dos profissionais de saúde
35. Use of complementary and alternative medicine by physicians in St. Petersburg, Russia
36. Homeopathy and complementary medicine in Tuscany, Italy: integration in the public health system
37. Attitudes toward integration of complementary and alternative medicine in primary care: perspectives of patients, physicians and complementary practitioners
38. Attitudes toward integration of complementary and alternative medicine in primary care: perspectives of patients, physicians and complementary practitioners
39. Complementary and alternative medicine: attitudes and patterns of use by German physicians in a national survey
40. Turkish general practitioners and complementary/alternative medicine
41. Towards a model for integrative medicine in Swedish primary care
42. Crenças populares referentes à saúde: apropriação de saberes sócio-culturais
43. Attitudes of traditional healers towards Western medicine in rural Cameroon
44. Knowledge and practice of complementary medicine amongst public primary care clinic doctors in Kinta district, Perak
45. Effectiveness gaps: a new concept for evaluating health service and research needs applied to complementary and alternative medicine
46. Providing Complementary and Alternative Medicine in primary care: the primary care workers' perspective
47. Complementary and alternative medicine: the move into mainstream health care
48. Complementary And Alternative Medical Practices: Training, Experience, And Attitudes Of A Primary Care Medical School Faculty
49. An approach for integrating complementary-alternative medicine into primary care
50. Primary care physicians' attitudes and practices regarding complementary and alternative medicine
51. Developing and evaluating complementary therapy services: Part 1. Establishing service provision through the use of evidence and consensus development
52. The attitude of community health nurses towards integration of traditional healers in primary health care in north-west province

53. Alternative medicine and the medical profession: views of medical students and general practitioners
54. Primary care physicians and complementary-alternative medicine: training, attitudes, and practice patterns
55. Support for non-conventional medicine in Israel: cognitive and sociological coherence
56. The role of culture in primary health care. Two case studies
57. Orientation of medical residents to the psychosocial aspects of primary care: influence of training program
58. Alumni perspectives comparing a general internal medicine program and a traditional medicine program
59. Community health workers in Bolivia: adapting to traditional roles in the Andean community
60. Traditional practitioners as primary health care workers: a study of effectiveness of four training projects in Ghana, Mexico and Bangladesh

LILACS = 0 títulos.

SCIELO = 4 títulos:

- 61.
62. Role of complementary therapies in the understanding of primary healthcare professionals: a systematic review
63. Atenção primária, atenção psicossocial, práticas integrativas e complementares e suas afinidades eletivas
64. Percepção de médicos e enfermeiros da Estratégia de Saúde da Família sobre terapias complementares
65. Crenças populares referentes à saúde: apropriação de saberes sócio-culturais

MEDLINE (via PUBMED) = 36 títulos:

66. Use of medicinal plants by health professionals in Mexico
67. Integrating traditional medical practice with primary healthcare system in Eritrea
68. Integration of complementary and alternative medicine with primary health care in Croatia – opinions of primary health care physicians
69. Investigation into factors influencing roles, relationships, and referrals in integrative medicine.
70. Paradigm shift: stages of physicians' entry into integrative practice.
71. Knowledge and attitudes of primary health care physicians towards complementary and alternative medicine in the Riyadh region, Saudi Arabia
72. Attitude of conventional and CAM physicians toward CAM in India.
73. Complementary medicine in general practice - a national survey of GP attitudes and knowledge.
74. Family Health Strategy doctors and nurses' perceptions of complementary therapies.
75. A study to examine the attitudes, knowledge, and utilization of CAM by primary care professional in West Texas.
76. Integrative medicine: enhancing quality in primary health care.
77. The integration of bio-medicine and culturally based alternative medicine: implications for health care providers and patients.
78. Complementary and alternative medicine: attitudes and patterns of use by German physicians in a national survey.

79. Use of complementary and alternative medicine by physicians in St. Petersburg, Russia
80. Attitudes toward integration of complementary and alternative medicine in primary care: perspectives of patients, physicians and complementary practitioners
81. Promoting lifestyle self-awareness among the medical team by the use of an integrated teaching approach: a primary care experience.
82. Models of health: a survey of practitioners
83. Communication about complementary and alternative medicine: perspectives of primary care clinicians.
84. The integration of complementary therapies in Australian general practice: results of a national survey.
85. Knowledge and practice of complementary medicine amongst public primary care clinic doctors in Kinta district, Perak
86. Effectiveness gaps: a new concept for evaluating health service and research needs applied to complementary and alternative medicine
87. Providing Complementary and Alternative Medicine in primary care: the primary care workers' perspective.
88. Complementary and alternative medicine: the move into mainstream health care.
89. Primary care physicians' attitudes and practices regarding complementary and alternative medicine
90. Complementary and alternative medical practices: training, experience, and attitudes of a primary care medical school faculty.
91. An approach for integrating complementary-alternative medicine into primary care
92. Developing and evaluating complementary therapy services: Part 1. Establishing service provision through the use of evidence and consensus development.
93. Alternative medicine and the medical profession: views of medical students and general practitioners
94. Primary care physicians and complementary-alternative medicine: training, attitudes, and practice patterns.
95. Evaluation and utilization of complementary medical procedures--a survey of 793 physicians in general practice and the clinic
96. Bridge between scientific medicine and complementary medicine--utopia?
97. Orientation of medical residents to the psychosocial aspects of primary care: influence of training program
98. Alumni perspectives comparing a general internal medicine program and a traditional medicine program.
99. Alternative medicine and general practitioners in The Netherlands: towards acceptance and integration
100. The interface of traditional medicine with conventional medicine and primary health care
101. WHO's traditional medicine programme: progress and perspectives

WEB OF SCIENCE = 0 título.

Segunda expressão de busca:

BVS = 90 títulos:

102. Fitoterapia na atenção básica: estudo com profissionais enfermeiros

103. Medicina Tradicional e Complementar no Brasil: inserção no Sistema Único de Saúde e integração com a atenção primária
104. Educação permanente em acupuntura: análise de um processo educativo e suas repercussões na prática de médicos da atenção primária à saúde
105. Práticas interativas e complementares grupais nos serviços de saúde da atenção básica: possibilidades de diálogo com a educação popular
106. Uso, cuidado e política das práticas integrativas e complementares na Atenção Primária à Saúde
107. Which CAM modalities are worth considering?
108. Opinião de médicos e enfermeiros sobre o uso da fitoterapia e plantas medicinais na Atenção Básica
109. Increasing resident recruitment into family medicine: effect of a unique curriculum in integrative medicine
110. Práticas integrativas e complementares e relação com promoção da saúde: experiência de um serviço municipal de saúde
111. Investigation into factors influencing roles, relationships, and referrals in integrative medicine
112. Política Nacional de Práticas Integrativas e Complementares como contribuição ao direito de escolha no campo da saúde
113. Compreendendo o impacto das diretrizes propostas pela Política Nacional de Práticas Integrativas e Complementares em serviços de homeopatia do Sistema Único de Saúde
114. A timely opportunity: fostering new roles for complementary and alternative health care providers in meeting the nation's need for primary health care.
115. Paradigm shift: stages of physicians' entry into integrative practice
116. The integrative medicine team--is biomedical dominance inevitable?
117. Diseño y metodología para el estudio de la utilización de servicios médicos y alternativos en un área de salud
118. Um método para a implantação e promoção de acesso às Práticas Integrativas e Complementares na Atenção Primária à Saúde
119. Práticas integrativas e complementares: oferta e produção de atendimentos no SUS e em municípios selecionados
120. Integration of complementary and alternative medicine in primary care: what do patients want?
121. O uso de práticas complementares por uma equipe de Saúde da Família e sua população
122. Práticas integrativas e complementares na atenção primária em saúde: em busca da humanização do cuidado
123. Atenção primária, atenção psicossocial, práticas integrativas e complementares e suas afinidades eletivas
124. Knowledge and attitudes of primary health care physicians towards complementary and alternative medicine in the Riyadh region, Saudi Arabia
125. Práticas integrativas e complementares: plantas medicinais e fitoterapia na atenção básica
126. O conhecimento dos profissionais de saúde acerca do uso de terapias complementares no contexto da atenção básica
127. Attitude of conventional and CAM physicians toward CAM in India
128. Integrative medicine models in contemporary primary health care
129. Percepção de médicos e enfermeiros da estratégia de saúde da família sobre terapias complementares
130. Family Health Strategy doctors and nurses' perceptions of complementary therapies
131. Government policies for traditional, complementary and alternative medical services in India: from assimilation to integration?

132. A study to examine the attitudes, knowledge, and utilization of CAM by primary care professional in West Texas
133. Integrative medicine: enhancing quality in primary health care
134. Knowledge, attitudes and practice of general practitioners towards complementary and alternative medicine in Doha, Qatar
135. Can we rapidly identify traditional, complementary and alternative medicine users in the primary care encounter?
136. Das Medicinas tradicionais às práticas integrativas de saúde: caracterização dos recursos humanos nas práticas alternativas de saúde adotadas no Distrito Federal
137. The integration of bio-medicine and culturally based alternative medicine: implications for health care providers and patients
138. Developing an integrative therapies in primary care program
139. Introducción a la acupuntura. Fundamentos e interés para el médico de Atención Primaria
140. Complementary medicine in the primary care setting: Results of a survey of gender and cultural patterns in Israel
141. Educational intervention to improve physician reporting of adverse drug reactions (ADRs) in a primary care setting in complementary and alternative medicine
142. Applying integrative healthcare
143. The cultural context of CAM
144. Complementary and alternative medicine in US family medicine practices: a pilot qualitative study
145. Hamilton, Jennifer L; Roemheld-Hamm, Beatrix; Young, Denise M; Jalba, Mihai; DiCicco-Bloom, Barbara
146. Use of complementary and alternative medicine by physicians in St. Petersburg, Russia
147. Attitudes toward integration of complementary and alternative medicine in primary care: perspectives of patients, physicians and complementary practitioners
148. Complementary and alternative medicine: attitudes and patterns of use by German physicians in a national survey
149. Turkish general practitioners and complementary/alternative medicine
150. Exploring different dimensions of holism: considerations in the context of an evaluation of complementary medicine in primary care
151. Models of health: a survey of practitioners
152. Complementary and conventional medicine in Switzerland: comparing characteristics of general practitioners
153. An approach to teaching primary care physicians how to integrate complementary medicine into their daily practices: a pilot study
154. The integration of complementary therapies in Australian general practice: results of a national survey
155. Complementary and alternative medicine (CAM) among hospitalised patients: reported use of CAM and reasons for use, CAM preferred during hospitalisation, and the socio-demographic determinants of CAM users
156. Knowledge and practice of complementary medicine amongst public primary care clinic doctors in Kinta district, Perak
157. Complementary and alternative medicine use in patients with chronic diseases in primary care is associated with perceived quality of care and cultural beliefs
158. Providing Complementary and Alternative Medicine in primary care: the primary care workers' perspective
159. Disentangling integrative medicine

160. Complementary and alternative medicine: the move into mainstream health care
161. Complementary and alternative medical practices: training, experience, and attitudes of a primary care medical school faculty
162. An approach for integrating complementary-alternative medicine into primary care
163. Primary care physicians' attitudes and practices regarding complementary and alternative medicine
164. Promoting CAM services
165. Integrative medicine: not a carte blanche for untested nonsense
166. Integrative medicine and systemic outcomes research: issues in the emergence of a new model for primary health care
167. Complementary medicine in primary care: time to decide. Royal Society of Medicine, London 27th March 2002
168. Developing and evaluating complementary therapy services: Part 1. Establishing service provision through the use of evidence and consensus development
169. Response to complementary and alternative medicine among family medicine and other primary care physicians in South Carolina
170. Complementary medicine: the alternative alternative?
171. Access to complementary medicine via general practice
172. Primary care as intersecting social worlds
173. General practitioners, complementary therapies and evidence-based medicine: the defence of clinical autonomy
174. The use of complementary and alternative medicine by primary care patients. A SURF*NET study
175. Primary health care transformed: complementary and orthodox medicine complementing each other
176. Mind-body innovations--an integrative care approach
177. Alternative medicine and the medical profession: views of medical students and general practitioners
178. Complementary healthcare practices and the implications for nurse practitioners
179. The complementary side of complementary and alternative medicine
180. Primary care physicians and complementary-alternative medicine
181. The relationship between research and service development: an illustrative example of a pilot study introducing complementary therapies into primary care
182. Use of and interest in alternative therapies among adult primary care clinicians and adult members in a large health maintenance organization
183. Primary care physicians and complementary-alternative medicine: training, attitudes, and practice patterns
184. Integrative therapies in primary care practice
185. Complementary care. Partnership pairs primary care with alternative therapies
186. Nonconventional medicine in Israel: consultation patterns of the Israeli population and attitudes of primary care physicians
187. Complementary practitioners as part of the primary health care team: consulting patterns, patient characteristics and patient outcomes
188. Complementary practitioners as part of the primary health care team: evaluation of one model
189. Beyond the boundaries: relationship between general practice and complementary medicine
190. La atención primaria de salud alternativa de promoción comunitaria

191. Alternativ helbredelse. Sygdomsspejl for det etablerede
